

INDUSTRIAL MIX

Engineered to Drive Performance

The recently expanded activator range is a game changer for VIM. Complementing the existing AU500 Medium Activator, the new AU574 HS Activator Slow and AU576 HS Activator Fast provide you with optimised system flexibility.

The activator range in combination with the VIM RS Reducer range allows you to adjust the flash off and curing times to suit your specific job requirements based on job size, complexity and ambient conditions.

For more details refer to the Activator and Reducer Selection Guide available on the VIM website or by scanning the QR code below.

PRODUCT FEATURES

- Compact Activator offering
- Provides optimised application technique
- Application flexibility regardless of temperature or job size
- 5L and 1L pack size

For more information on the HS Activator Range or any other Valspar Industrial Mix products, contact your local VIM distribution partner, or visit www.valsparindustrialmix.com.au.
